

PROCESS

Let's create! First, I will need an idea of what you are after. Who would you like to target? What do you like and dislike? What designs and colors appeal to you and your target market? Are you trying to evoke emotions with your branding? Is there anything else you think might be important to tell me?

After initial discussion, I will put together a design concept.

Please submit the **exact size requirements** for your project, and final file format(s) needed.

Design services do not include printing. I can recommend local printers and deliver files to them if your project will be printed.

Final files are prepared into required formats: print or web.
